My Hero Academia is back! Kind of. The two new OVAs (Original Video Animation) may not contribute much to the overall plot of the show or offer many clues as to what's coming next, but they are good reminders of what My Hero can do at its best. These standalone stories get you reacquainted with most of the main cast, expand the world of MHA, and also provide enough superpowered laughs and fun to make the wait for Season 6 easier.OVAs, in general, are not what they used to be. Back in the '80s and '90s, when home video exploded in popularity, they were an avenue to produce edgier, more mature animation that couldn't get past TV sensors. From gory and violent shows like Bubblegum Crisis and Hellsing Ultimate, to experimental ones like FLCL and Gumbuster, or complex, epic sci-fi operas like Legend of the Galactic Heroes, there was an OVA for everything. Nowadays, most high-profile OVAs tend to be short episodes or bonus features released on home video as cool extras to reward fans. Shows like Attack on Titan released OVAs that expanded their world without distracting from the main plot. The Most Underrated Anime to WatchMy Hero Academia had already released several OVAs, but not to this level of anticipation. After a lackluster reception to Season 5, a smash hit film, and an adaptation of an acclaimed arc coming soon, it is the perfect time for the show to remind us why we've stuck with it for many years, and prepare us for what's to come.The two new OVAs are as different as they come. HLB, or Hero League Baseball, is essentially an episode-long game of baseball between Gang Orca's hero agency and Lion Hero: Shishido and his agency. Meanwhile, Laught As If You Are in Hell feels more like a standard episode of the show, with Midoriya, Bakugo, and Todoroki working with Endeavor to stop a criminal whose quirk makes people around him laugh uncontrollably. Just like the last time a big shounen anime did a baseball episode (Jujutsu Kaisen), the HLB episode is a hilarious success. Rather than remotely attempt to connect this episode to the events of last season, it is mostly just an excuse to show how superpowers would affect sports in this world. The result is essentially Super Mario Strikers but with baseball — i.e. a no-holds-barred bloodbath. The animation may not reach the heights of the main series, but it still knows when deliver energetic moments of action to highlight the quirks.And this is what makes this an essential episode for My Hero Academia, even if it doesn't move things forward. It explores a rather mundane part of the show's world and uses its runtime to answer the question of how it would work with superpowers, all while reminding us of which character has which power ahead of the new season. Seeing the over-the-top violent and creative ways the players use their quirks not just to score but to put the other team out of commission is thrilling and some of the most fun the show has been in a long while. Whether it's Mineta using one of his adhesive spheres disguised as a baseball to knock out the batter using his own strength, or Gang Orca using his sonar to affect the ball's movement, or Shishido just throwing the ball so hard it destroys the home base and knocks out both the batter, the catcher, and even the umpire, it's all delightful, superpowered madness.If nothing else, they serve as good reintroductions to this world and these characters before the new season. "Sadly, the second episode feels more like retreading old ground, focusing on a criminal that must be stopped. That the villain is essentially a Joker-like character does result in some fun scenarios where every character starts laughing uncontrollably. Also, the episode does work well as a season premiere-like recap, bringing us up to speed on where the characters are in their journeys, with Midoriya, Bakugo, and Todoroki still doing their Hero Work-Studies at Endeavor's Agency, and mentions of the Meta Liberation Army and other story beats from last season. Still, it feels rather inconsequential, and the episode ends a bit too abruptly.Did we need these OVAs? No. Do you need to watch them to understand the previous or the next season? Probably not. That being said, you can still gain something from them. If nothing else, they serve as good reintroductions to this world and these characters before the new season, and the baseball episode is a delightful one-off story I wouldn't mind seeing more of. How does football, or wrestling work with quirks? Maybe we'll find out one day. In many ways, the anime My Hero Academia is regarded as one of the best current modern shounen series. Character development, combat, designs, and concept are all excellent in MHA. And because of the shounen series' success, it grew to be as big as it was. My Hero Academia Season 5 Episode 1 Release Date. Latest Updates from My Hero Academia Season 5 The first episode of MHA Season 5 premiered on April 27, 2021. If you've previously seen it, you're probably wondering what the problem is with the animation. This episode was actually episode '0', not episode '1.' We all noticed it. The decision to make the first episode an anime original was most likely made at the last minute by the production firm. Because of this, the artwork appeared to be a little bit erratic. Let's see if the classic animation returns in My Hero Academia Season 5, Episode 1. Overall, it wasn't too horrible because we got to see the students reintroduced and hear some explanations about what happened in the previous season. I know we were all so excited for MHA Season 5 due to how the last season ended. We were hoping for a knockout entry, but fear not: the real show begins the next week. My Hero Academia Season 5 Episode 0 This season began with an episode titled '0', which is pretty perplexing and yet another #JustAnimeThings entry. So, if you happen to miss this episode, you won't be losing anything in terms of general story background. The episode largely serves as a great recap of the cast of Class 1-A and their abilities. However, just because we get to watch this ragtag collection of heroes doesn't mean there isn't enjoyment to be had. In addition, we get to observe our heroes in training get up to all kinds of mischief. So, without further ado, let's delve into Season 5, Episode 0 of My Hero Academia! My Academia Season 5, Episode 0 begins in the United States of America, with class 1-A discussing the MHA Season 4 finale. The high-end Nomu was taken down by hawks doing their thing and being badass. It presents a highlight reel of the episode in case you missed it in all of its grandeur. Now there's a nice little moment where Moneta and Shoto are talking about a project they're working on together. "So you can be proud of your father eh?" Moneta says to Shoto. Endeavor made his small boy proud, as Shoto answers, "Yeah that's true." We are introduced to the idea of this episode later, as class 1-A is set to begin their training. As an alarm sounds, class 1-A is informed that there are phoney villains in the school, and it is their responsibility to deal with them. As Deku explains the foundation of the hero world once again, Class 1-A dresses up to the rocking melody of hero A. Someone ought to keep track of how many times he's done it now. There's also a wonderful touch here because it's the first time in Season 5 of My Hero Academia. When Midoriya talks about professional heroes, he doesn't say "all might," but rather "endure." Finally, we have the premiere of My Hero Academia Season 5! Class 1-A was separated into four teams upon arrival at the scene: the reconnaissance team, the rescue team, the disaster relief team, and the Bakugou squad. Within these groups, each character demonstrates their special abilities in their own way. We also get some interesting moments, such as Shoto using his ice wall again and Mina, Uraraka, and Sero doing a fantastic team-up move. However, just as it appears that Class 1-A has everything under control, Nejire and Tamaki appear as villains. Later, a fight breaks out between class 1-A and a large tree, resulting in a combat. Tamaki is a bit more of a problem, at least until the Bakugo squad arrives in a sports car. Bakugo, Kirishima, and Kamimari hijack a car, constituting a straight-up Tamaki drive-by. While Kirishima headbutts his fathom companion, Tamaki is terrified by Bakugo's pure unyielding aggression. Class 1-A successfully completes their disaster simulation training! Bakugo blows up Tamaki for delaying in their bouts, assuming he wasn't taking them seriously. Bakugo appears to have killed Tamaki by the end of My Hero Academia Season 5, Episode 0. However, we see them shortly after their battle in an after-credits sequence. Dabi faced off against High-end Endeavour and Hawks! Hawks appears in a dark alleyway, face to face with Dabi, in the episode's final shot. And that concludes Season 5 Episode 0 of My Hero Academia! Also Read: Black Clover Chapter 326 Raw Scans, Release Date, Spoilers And Speculations My Hero Academia Season 5 Episode 1 : Predictions and Possibilities If you've seen the trailer for My Hero Academia Season 5, Episode 1, you already know it's going to be entertaining. The title of this episode will be 'Vestiges,' and it will premiere on April 3rd, which is the following week's Saturday. The aftermath of the Nomu fight will be shown, and Dabi will appear and be frightened away. We also get to see the start of the Dabi and Hawks storey, which follows Todoroki's material. In My Hero Academia Season 5, Episode 1, we may possibly see the true beginning of Deku's dream. Season 5, Episode 1 of My Hero Academia is now available. You would believe that, but wouldn't that be a spoiler for episode 0? The answer is a resounding "NO," because the anime's storey is entirely original, and episode 1 is a manga adaptation. If you're unaware, the final arc of My Hero Academia Season 4 was never completed, therefore the storey will continue with My Hero Academia, Season 1! It doesn't begin with the training arc that we've seen in all of the promotional media, where class 1-A and 1-B practise together. Also included is Shinzo, who was previously not a member of the hero course but fought in the MHA Season 2 sports festival. The following is a synopsis of the episode: "The last time we saw Endeavour and Hawks, they were victorious over a terrifyingly powerful high-end Nomu, but the one who emerged in front of Endeavor and got himself beaten up was a league of villains Dabi." So, how are Endeavor and Hawks going to get out of this mess? Izuku, on the other hand, had a strange dream one night. 'One For All,' who couldn't talk in front of Izuku, and 'One For All,' who appeared as a little brother." If this seems eerily similar to MHA Season 4's final episodes, it's because it is. There are only a few episodes left in the arc, and we'll be done in no more than two. If you recall, Deku also saw the other prior users of 'One For All' lined up next to him. This is all happening right in front of our eyes, but keep in mind that this is only My Hero Academia Season 5, Episode 1, so it won't be the first thing you see. My Hero Academia Manga: Chapters to be covered in the series So far, 18 novels and 29 volumes have been published in the My Hero Academia manga. Horikoshi, the manga's creator, is now working on more strips in order to expand the manga's chapters. The manga has already generated an anime, which has garnered a lot of positive feedback from manga enthusiasts. You may have heard the news about the manga floating on the internet for a few days. Is the MHA manga going to be completed? Unfortunately, the manga adaptation of My Hero Academia is coming to an end. Horikoshi made the announcement at the Jump Festa 2021 super stage event. Now the question is, what will happen with the series? Is MHA Season 5 going to be the final season? It all depends on how many chapters are addressed in Season 5 of My Hero Academia. 1: Chapter 190-1922: Chapter 193-195ish 3: Chapter 195ish-198ish 4: Chapter 198ish-2015: Chapter 202-2056: Chapter 206-210ish7: Chapter 210ish-2128: Chapter 213: 216ish9: Chapter 216ish-21710: Chapter 218-21911: Chapter 220-22212: Chapter 223-22513: Chapter 226-228ish14: Chapter 228ish-23015: Chapter 231-23316: Chapter 234-23617: Chapter 237-23918: Chapter 240-24219: Chapter 243-245ish20: Chapter 245ish-24721: Chapter 248-250ish22: Chapter 250ish-25223: Chapter 253-255The release date for the most recent chapter of the MHA manga has been set for April 4th, 2021. This implies that there's a chance we'll get My Hero Academia Season 6, and MHA Season 5 isn't the final season! I'm guessing the final episode of MHA Season 5 will be a cliffhanger, as we'll have to wait yet another year for season 6. What are your thoughts? With that said, that concludes our knowledge of My Hero Academia Season 5, Episode 1! Also, have a look at the most recent preview.
